About the Route 9 Safety and Operational Study

The purpose of this project is to conduct a Safety and Operational Study (SOS) of Route 9 in Virginia, encompassing 13 miles from the West Virginia border to Route 7. The study will identify safety and traffic operational issues and present recommended solutions for consideration by the Board of Supervisors.

Throughout the study, public and focus group meetings will be held to capture local observations, perspectives and concerns along the corridor, to ensure any proposed improvements along Route 9 will continue to carry local and commuter traffic safely and efficiently while preserving the rural context of the roadway.

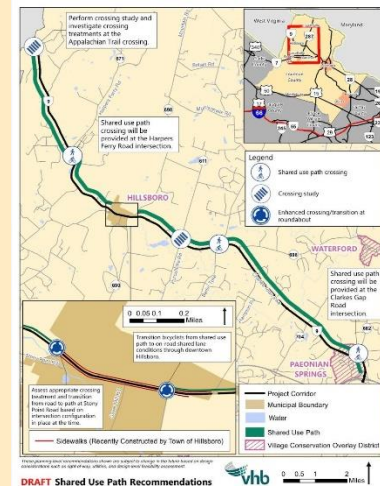

Anticipated completion of the study is Spring of 2022.

Virtual Public Input Meeting Completed - September 22

Loudoun County hosted a virtual public input meeting on September 22, 2021. The study team already prepared and evaluated short-term operational and safety improvements. During this most recent virtual public input meeting, the study team presented alternative corridor concept plans for long-term (year 2040) improvement concepts.

Survey and Comment Period, Open NOW - October 14, 2021

The Route 9 study team now wants to hear from you on the long-term (year 2040) improvement alternative proposals that were presented in the September 22, 2021 meeting.

Please take a moment to review the materials and submit your input on Concept Alternatives A & B. The survey and comment period to provide feedback is open NOW - October 14, 2021.
