

Preparing for Hurricane Florence

Most Likely Arrival Time of Tropical-Storm-Force Winds

I encourage all residents to take steps now to prepare for the potential impacts of Hurricane Florence, which is expected to approach the East Coast on Thursday. The storm may result in heavy rain and flooding, high winds and loss of power in Loudoun County.

Information Resources:

Roads

Road Conditions/Closures Phone Line: 511
Report Road Closure: (1-800-367-7623)

Power Lines/Outages

[Dominion Power](#): 866-366-4357
[Dominion Power-Mobile Site](#)
[NOVEC](#): 888-335-0500

Because we have already experienced significant rainfall during the past week, waterways are high and the ground is saturated, increasing the potential impact of additional rains associated with this storm.

Here are five things to help you prepare for the impact of this storm in Loudoun later this week:

1. Know the Forecast

- Get the most current forecast from the [National Weather Service](#) (NWS), which has issued a Hazardous Weather Outlook that includes Loudoun County. Follow NWS on [Facebook](#) and [Twitter](#).
- Follow updates on Hurricane Florence on the [National Hurricane Center website](#), [Facebook](#), and [Twitter](#).
- A Flood Watch means that a flood is possible in the area. A Flood Warning means flooding is already occurring or will occur soon.

2. Prepare Your Property: Reduce the Risk of Damage to Structures

- If possible to do so safely, clear loose and clogged rain gutters and downspouts before Thursday.
- Trim trees and shrubbery. Rain-saturated ground increases risk for falling trees. Consult a certified arborist if you need help.
- If you have a sump pump, make sure it is working and that the outlet pipe is not blocked. If possible, install a battery-operated backup in case of a power failure.
- Anchor any fuel tanks.

- Bring in outdoor furniture and move important indoor items to the highest possible floor.

3. Prepare for Power Outages and Potential Hazards

- Fuel and service your vehicles.
- Make a plan to ensure food & water for your livestock. This became an issue for many farmers during the last extended power outage.
- Remember to run generators only outdoors to avoid carbon monoxide poisoning.
- Check emergency equipment, such as flashlights, generators and battery-powered NOAA Weather Radio. Keep your cell phones charged.
- Stock up on batteries, food that will keep, first aid supplies, drinking water, and medications.
- Have cash on hand in case power goes out and ATMs don't work.
- Review your insurance policy.
- Check on your neighbors who are older adults to ensure they are prepared ahead of the storm and safe during and after the storm.
- Tips on what supplies to put in your emergency kit are online at www.loudoun.gov/makeakit.

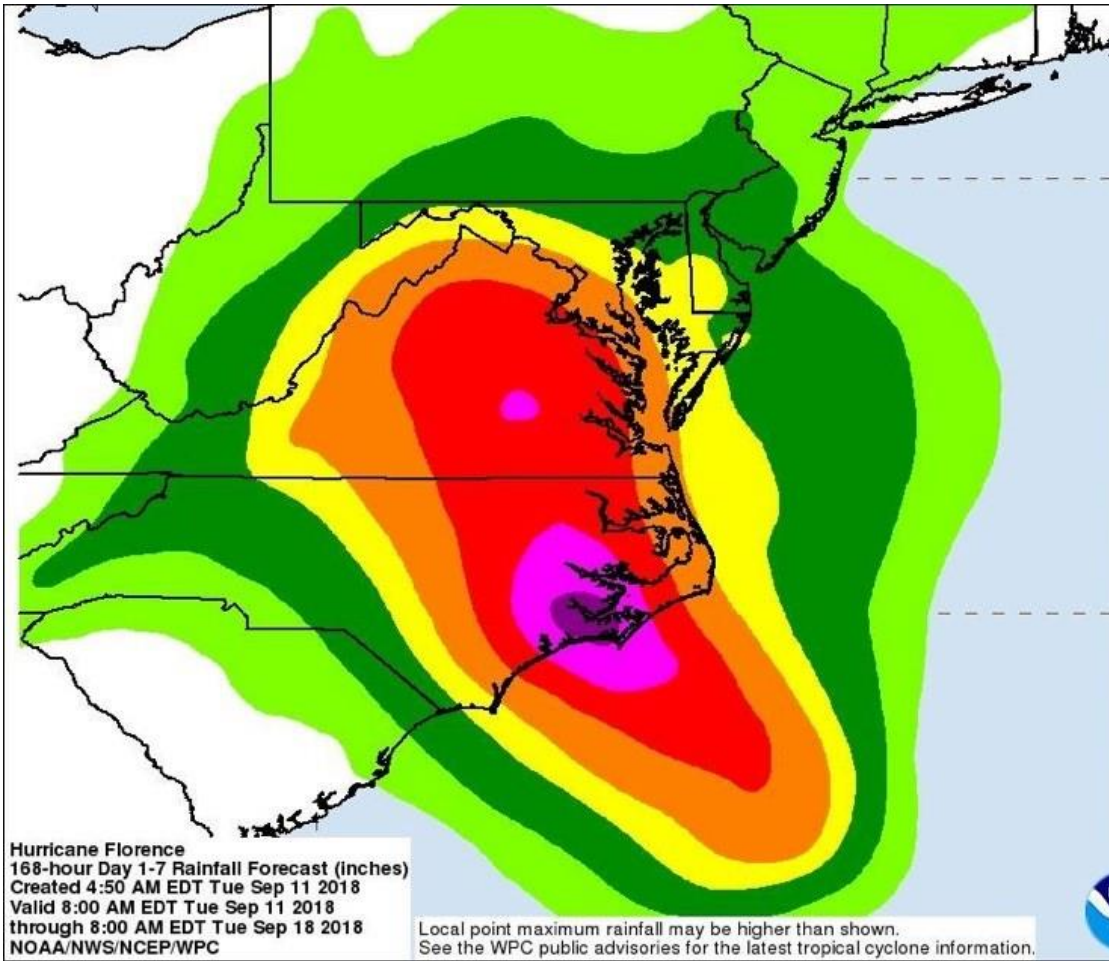

- Learn more about flooding preparedness at www.loudoun.gov/flood, which includes contact information for local utilities.

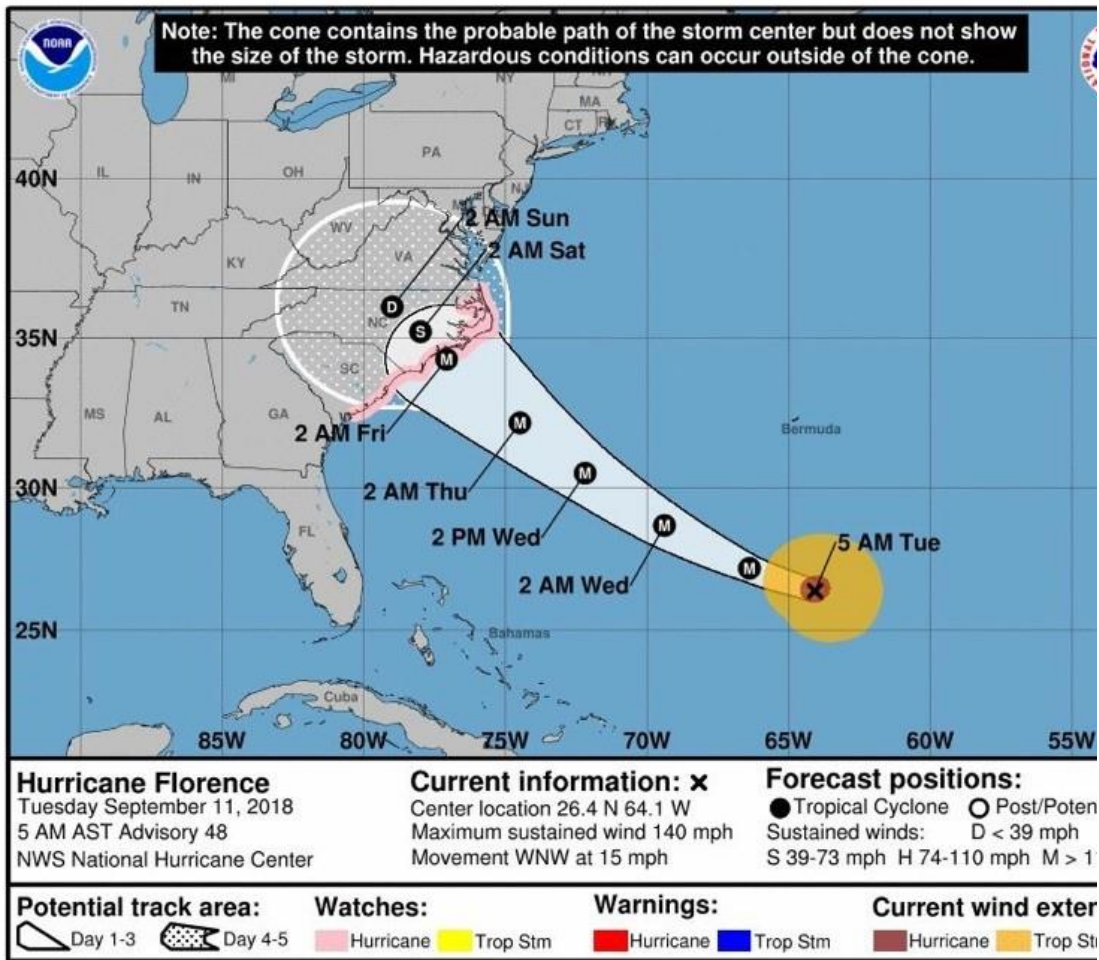

4. Stay Informed

- Sign up for AlertLoudoun at www.loudoun.gov/alert to receive weather, news and traffic alerts by email and text.
- Follow Loudoun County Government on [Facebook](#) and [Twitter](#).

5. Turn Around. Don't Drown!

- Take 50 seconds to watch this [YouTube video](#) - it could save your life.
- If you come to a flooded roadway, stop and do not cross. It is impossible to determine the depth of the water or the condition of the road under the water. It takes just 12 inches of flowing water to carry off a small car and just six inches of water to knock a person down and carry them away.

Loudoun has a broad range of resources posted online to help. Visit www.loudoun.gov/hurricane to learn more about hurricane preparedness.

All my best,
