

ROUTE 15

ONLINE SURVEY

Dear Residents,

Route 15 concepts were presented for the northern part of the Route 15 corridor (Montesor Road to Point of Rocks Bridge) at the September 26 Open House at the Lucketts Community Center. We would like to get your input on the concepts through the online survey.

The survey presents three options for consideration:

- **No Build** - Keep the road as is.
- **Option A** - Keep Route 15 as two lanes but add a median and adequate shoulders between Montesor Road and St. Clair Lane; the segment north of St. Clair Lane would remain two lanes undivided but would add shoulders to that portion of the road.
- **Option B** - Widen Route 15 to four lanes from Montesor Road to the southern portion of the Village of Lucketts with a median, and improve the roadway section between Lucketts and

St. Clair Lane to provide safety improvements described in Option A.

Both options A and B propose a bypass around the Village of Lucketts. The survey also asks if there is a preference for the bypass to be located on the east or west side of Lucketts.
