

-- Public Notice --

U.S. Environmental Protection Agency

Hidden Lane Superfund Site

Sterling, Loudoun County, VA

--Proposed Remedial Action Plan Released--

The United States Environmental Protection Agency (EPA) has released its Proposed Remedial Action Plan (Proposed Plan) for the Hidden Lane Superfund Site located in Sterling, Virginia. EPA is issuing this Proposed Plan to present the Preferred Alternative for an interim remedial action to address exposure of the public to site-related contaminants in groundwater in private drinking water wells. **Preferred Alternative 4:** Extension of the Public Water Supply Line with Land Use Controls is proposed.

The proposed actions include:

- Connecting properties whose wells are currently or may potentially become contaminated with trichloroethylene (TCE) above the maximum contaminant level to the existing Loudoun Water supply system.
- Maintaining the existing Point-Of-Entry Treatment Systems until connection to the public water supply line is completed.
- Disconnecting existing wells from the private drinking water supply. Disconnected wells would either be abandoned or could be used for non-potable use.
- Establishing land use controls to ensure residents are not exposed to unacceptable levels of site-related contaminants in groundwater.

Review the Proposed Plan
