

Frequently Asked Questions about Plats & Surveys

What is a Plat?

A plat shows how a piece of land is divided into lots and usually shows information including setbacks, coordinates, and easements. The Office of Mapping and Geographic Information receives preliminary subdivision plats to assign street addresses or adjust parcel boundaries. These plats show the metes and bounds of multiple lots and do not typically show building footprints or other ground features. A final version of the subdivision plat, which is similar but may show more information, is recorded at Clerk of the Circuit Court.

We do not have individual property plats or house location surveys in the Office of Mapping & Geographic Information, nor are they included with the required documents that are legally recorded at the Clerk of the Circuit Court when there is a change in real property ownership.

This plat, with a screen print from our [WebLogis Online Mapping System](#), is often used to meet permit application requirements for a deck or other small residential project. Applicants may use the WebLogis print as a template to [draw their site plan and label required distances](#). [HOAs](#) may have different permitting requirements.

Plat vs. Survey

Plats typically show the boundaries and dimensions of multiple parcels but do not include improvements or constructed features, like buildings. Surveys typically show the property with locations of ground features and improvements, such as buildings, fences, water features, and driveways.

Surveys are performed by independent, state-licensed land surveyors and are often required or offered during the home buying process as part of the closing documentation. The title company, settlement agent, attorney, lenders, or the surveyor may be able to provide a copies of surveys and other closing documents.

However, surveys are not included with the required documents that are legally recorded at the [Clerk of the Circuit Court](#) when there is a change in real property ownership. They will typically have the subdivision plat.

How do I get a survey?

If there is an existing survey of your property, it is most likely with your closing paperwork. Previously submitted [Building Permit and Zoning Permit applications](#) sometimes include a survey or individual plat. If you know projects have previously been permitted on your parcel, Department of Building & Development may have a survey copy with the original application. Please email bad@loudoun.gov with your property's tax map # to request a record check for existing surveys.

If you decide to have your property surveyed, you will need to hire an independently licensed land surveyor. Loudoun County does not perform property surveys and cannot make recommendations for land surveyors.

You may check surveyor records and license currency through the [VA Department of Professional and Occupational Regulation](#). There are different survey types with varying levels of detail and price ranges, a land surveyor will be able to explain the options and make sure that it meets the HOA's or other requirements.

Which Loudoun County Department should I contact for Land Information & Records?

Contact [Department of Building & Development](#) about:

- Boundary Line Adjustments and land subdivisions
- construction and site plan engineering questions
- dedications, easements, and other plat features
- Land Development Application forms and copies
- locating property corners and setbacks
- permit applications

Phone: 703-777-0220 **Email:** bad@loudoun.gov

Contact [Department of Planning & Zoning](#) about:

- allowable land uses and rural uses
- Legislative Land Development Applications
- [Loudoun Online Land Applications \(LOLA\) tool](#)
- zoning determinations and ordinances

Phone: 703-777-0246 **Email:** dpz@loudoun.gov

Contact [Office of Mapping & Geographic Information](#) about:

- addresses and street names
- Conservation Easement Stewardship Program
- GIS data, maps, or plats
- [Loudoun GeoHub](#)
- [WebLogis Online Mapping System](#)

Phone: 703-771-5778 **Email:** mapping@loudoun.gov or conservationeasements@loudoun.gov

Contact [Health Department: Administrative & Environmental Health Offices](#) about:

- environmental and public health
- regulation of lodging and food service businesses
- well and septic inspections and permits

Phone: 703-777-0234 **Email:** health@loudoun.gov

Contact [Clerk of the Circuit Court: Historic Records & Deed Research](#) about:

- obtaining legally recorded property information, such as:
 - deeds and subdivision plats (no house location surveys)
 - Permanent Open Space Easement (POSE)/conservation easement agreements
- researching historic records
 - birth, death, marriage, and black history records
 - court cases and judgments
