Loudoun County Carbonate Area with Mapped Sinkholes - Route 15 Corridor

Leesburg Crossing Subdivision (photograph date: April 6, 2005)
The sinkhole is approximately 8 feet in diameter and opened during well installation.

Raspberry Falls Subdivision (photograph date: October 18, 2004)
The sinkhole is approximately 20 feet in diameter and 15 feet in depth.

Selma Estates Subdivision (photograph date: March 27, 2003)
The sinkhole is approximately 30 feet in diameter and 30 feet in depth and opened approximately 100 feet from a well being installed.

Leesburg Crossing Subdivision (photograph date: April 9, 2005)
The sinkhole is approximately 5 feet in diameter and 3 feet in depth.

Morven Park
Older sinkhole beginning to heal over. Approximately one year later, the sinkhole reopened at the same location. The sinkhole is approximately 20 feet in diameter and 15 to 18 feet in depth. (photograph date: June 29, 2006; source: Leesburg Today)

Exeter Subdivision (photograph date: January 10, 2002)
The sinkhole opened around a 24-foot spruce tree (6 feet exposed).

LEESBURG
Route 15 Business near Dry Hollow Road (photograph date: July 22, 2005)
The sinkhole is approximately 3 feet in diameter and 6 to 8 feet in depth.

Ziai Subdivision (photograph date: August 30, 2006)
Sinkhole with debris. Sinkholes have historically been used as a location for trash/debris collection.

Notes:
1. Roads, parcels, waterbodies, limestone (Loudoun County Carbonate Area) were sourced from the Office of Mapping and Geographic Information, Loudoun County, VA.
