Improving Access and Mobility in Northern Virginia

On May 18, 2011 the Commonwealth Transportation Board established a new Corridor of Statewide Significance (CoSS) in Northern Virginia. The North-South Corridor comprises a band of multimodal facilities from the interchange of I-95 and VA 234 (Dumfries Road) in Prince William County that connect with I-66, U.S. 50 (John Mosby Highway), VA 267 (Dulles Greenway), and VA 7 (Harry Byrd Highway). Important roadway facilities along the corridor include VA 234 (Dumfries Road/Prince William Parkway) west of the City of Manassas, the planned Tri-County Parkway segment between U.S. 50 and I-66, and VA 659 (Belmont Ridge Road) in Loudoun County.

The North-South Corridor is one of 12 corridors that have been defined throughout the Commonwealth of Virginia. The Office of Intermodal Planning and Investment, housed within the Office of the Secretary of Transportation, is the study sponsor. More information on the network of Corridors of Statewide Significance can be found at www.vtrans.org.
